

We recently purchased a new office building for our company. During the inspection process we were recommended to Commercial Solutions, Inc. and they informed us that the roof was in very bad shape. Water was being trapped between the original roof and a replacement roof that was added some time later. Phil and Marc were both very helpful and informative during the entire process and were willing to turn the project around in a very short time frame. The entire project was completed and exceeded expectations within a week. Not only were all on-site employees very professional, they kept us up to date on the stages of the project including pictures of the completed project.
